PROFILE

I'm a self-taught developer with over 10 years of experience, creating user-friendly products with a strong focus on usability, performance and maintainability. I work almost exclusively with TypeScript, building web applications with React and Next.js and native iOS and Android apps with React Native and Expo. I love type-safe architectures: monorepos with shared libraries, fully typed API contracts between frontend and backend, and extensive end-to-end testing with Playwright and Maestro to ship stable products with confidence.

My personal goal is to expand my skills day by day to improve performance as well as user experiences.

EXPERIENCE

Karl-Franzens University in Graz

09/2010 - 12/2010
Internship as IT manager

König & Co. GesmbH, Graz

11/2011 - 06/2013
